PROFESSIONAL SUMMARY

iOS Engineer (1.5+ years) delivering production fintech and telecom apps using Swift, SwiftUI, UIKit, MVVM, and REST APIs.

Own end-to-end feature delivery: API integration, state management, navigation, performance tuning, and release readiness in fast-paced teams.

Reliability-first mindset for critical journeys (payments, plans, onboarding) with clean, modular, testable code and strong execution.

EXPERIENCE

Quokka Labs — Associate Software Engineer (iOS), Noida **Feb 2025 - Present**

- Ship end-to-end iOS features in production apps using SwiftUI/UIKit, MVVM ViewModels, and robust REST API integration.
- Harden critical workflows (payments, plan selection, navigation) via resilient error states, edge-case handling, and regression prevention.
- Improve stability and UX by debugging complex issues, validating flows with QA/product, and ensuring release-quality readiness.
- Selected as a campus-hiring technical interviewer; assess iOS fundamentals, architecture, and problem-solving across candidates.

Selected App Store Releases **2025 - 2026**

- SmartCash (Fintech): apps.apple.com/in/app/smartcash-psb/id1598558834
- SmartGen (AI Energy Tracker): apps.apple.com/in/app/smartgen-ai-energy-tracker/id6736756705
- LangTalk (Language Learning): apps.apple.com/in/app/langtalk-learn-languages/id6478437989
- Portfolio (case studies): aryan-builds-apps.lovable.app

EDUCATION

Jaypee Institute of Information Technology **May 2021 - Jul 2025**

B.Tech, Computer Science | Noida, India

TECH STACK

Swift | SwiftUI | UIKit | MVVM | Combine | async/await | REST APIs | JSON

CORE STRENGTHS

- Architecture: MVVM, modularization, protocol-oriented design, dependency injection
- Quality: XCTest unit testing, debugging, release hardening, regression prevention
- Performance: SwiftUI state optimization, rendering efficiency, memory-safety mindset
- Delivery: end-to-end feature ownership, API contracts, cross-functional collaboration
